Foster & Partners

These Ultra luxurious apartments range in size from 4,300 sq ft to over 8,000 sq ft and occupy approximately 57,000 sq ft of internal space. All apartments boast underground car parking facilities and outside space, whilst two apartments will feature indoor swimming pools.

This project required careful consideration of construction methodology for the construction of a complex deep basement and market leading internal finishes.

In the heart of the prestigious and fashionable district of Belgravia, 21 Chesham Place offers a discerning choice of residence in one of London's most important Conservation areas. Quiet, elegant streets combine with a close proximity to the highlights of London life, in a location which has traditionally been home to Prime Ministers, Ambassadors and aristocrats.

Construction value was £26 million.
